Thank you for having chosen a Brunner quality tent.

This product has been developed and manufactured in order to give you long term satisfaction. All pitching accessories are supplied. In case you need special additional parts please contact your specialist outdoor retailer.

Have fun!

Pitching preparations:

Connect the segments of the tent poles and sort them into groups according to their length.

Close zippers of all entrances and windows.

Carefully choose the final location of the tent.

STEP 1

Spread the flysheet on a flat, clean and sufficiently large area.

Insert the flexible tent poles into the respective pole sleeves (Follow the colour-marks).

STEP 2

Now insert the pole ends into the metal pins fixed to rings and rubber braids. Start from the front area and end with the rear part of the tent. At the end of this mounting stage the tent will be erected.

Fix the flysheet with pegs - it should be under gentle tension - do not exceed.

STEP 3

Open the zippers of entrances and windows and fix the inner tent to the rings located inside the flysheet.

Secure the inner tent anchoring the corners to the ground using tent pegs.

The inner tent divider can now be fixed.

Attach all guying ropes to the respective anchor points and tighten. Do not exceed with tension.

STEP 4

Apply the roof cover and fix it to the metal poles

Spread the tent carpet in the front area and fix it with pegs.

Attention: Do always clean and dry the tent before storage. Remember to close zippers of entrances and doors.
